

## TECHNICAL DATA SHEET

Semi-rigid PVC sheet suitable for contact with various chemical reagents or aggressive substances such as acids, alkalis, bases and salts, suitable for coating galvanization tanks and flooring. (Art. 4200)

### Classification

Typology	Semi-rigid extruded PVC sheet
----------	-------------------------------

### Technical features

Total thickness	EN 24346	1 – 2 – 3 mm
Weight	EN 23997	1,3 – 2,7 – 4,0 kg/sqm
Surface		Smooth shiny

### Performance

Hardness	Shore A	94
Breaking load		24 N/ mm <sup>2</sup>
Elongation at break		180 %
Cold flexibility		-18° C
Softening temperature		60° C
Melting temperature		180° C
Resistance to chemical agents		Very good

### Environment

REACH regulation	Does not contain SVHC substances
Recyclability	100% riciclabile

### Format and dimensions

Sheet	EN 24341	1.0-1.5 x 20 m
-------	----------	----------------
